

Patients Appointment Details(---RETIRED---)

Grade settings: Maximum grade: 100

Disable external file upload, paste and drop external content: Yes

Based on: [Patients Appointment Details\(---RETIRED---\)](#)

Run: Yes **Evaluate:** Yes

Automatic grade: Yes

Write a query to display the unique appointment information of all the patients. Give an alias name as 'Appointment_Info' for the appointment information of all the patients.

Sort the results based on the Appointment_Info in descending order.

Sample Data:

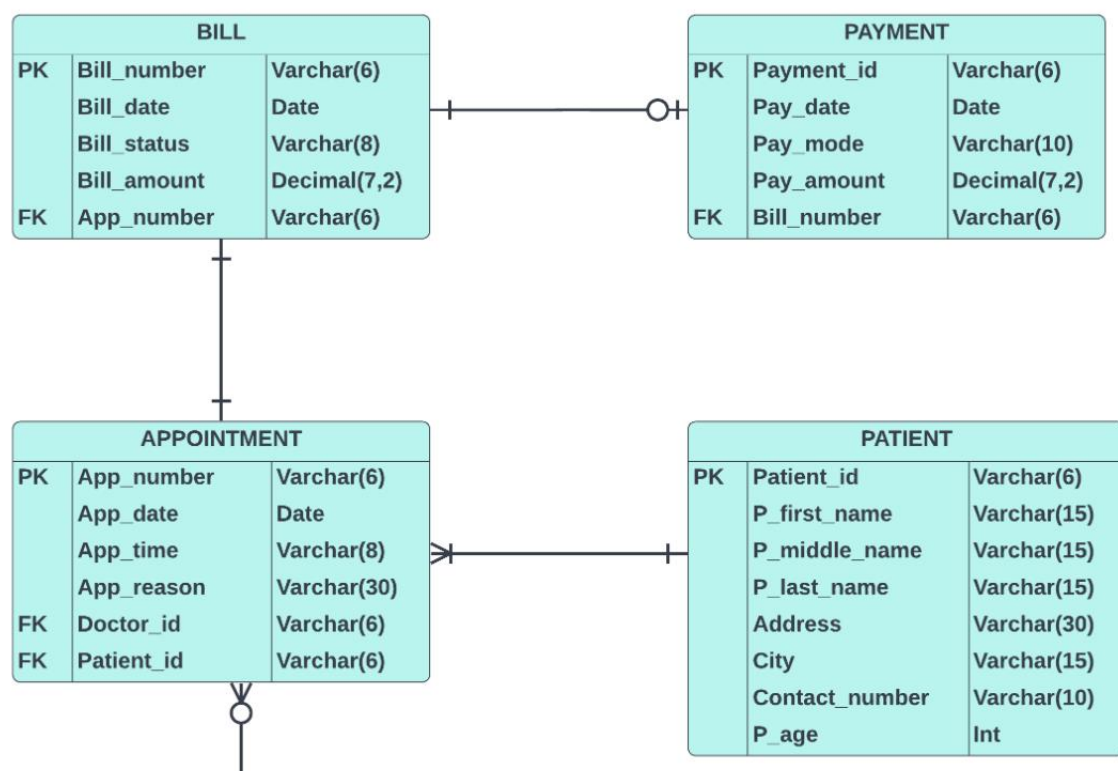

p_first_name has an appointment with Dr.**dr_first_name**

Sample Output:

Appointment_Info

Angel has an appointment with Dr.Santner
