Appointment Info(---RETIRED---)

Grade settings: Maximum grade: 100
Disable external file upload, paste and drop external content: Yes
Based on: Appointment Info(---RETIRED---)
Run: Yes **Evaluate**: Yes
Automatic grade: Yes
Write a query to display the first name and dayname of the appointment date for the patients whose age is less than 18 as given in the sample output. Give an alias name as App_Info.
Sort the results based on the App_Info in ascending order.

Sample Data:

**P_first_name** has got an appointment on **App_Date**

Sample Output:

App_Info
Tim has got an appointment on Monday

(**Hint:** Data is case-sensitive.)

DOCTOR-PATIENT
